DETAILED ACTION

Information Disclosure Statement

1. The examiner has considered information disclosure statement (IDS) submitted on 10/6/02.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-7 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Heisley et al. (6,333,623).

Heisley et al. disclose a complementary follower output stage circuitry and method for low dropout voltage regulator in Figs. 6-12. A current limiting circuit voltage regulation (100), a device (120), a regulation component (104), an element (102) feedback loop (114), error amplifier (110), reference voltage (112), a feedback network (116), first mode (current source), second mode (current sink). See col. 6, lines 19-65, and col. 7, lines 50-65.

Allowable Subject Matter

4. Claims 8-16 are allowed over the cited prior art.
5. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: None of the cited prior art disclose or teach a current limiting voltage regulation circuit with a second transistor coupled to the first transistor and the output transistor, wherein a current through the second transistor is mirrored in the output transistor if the first transistor is in the second mode or with an element that limits current at the output node when the device is in the second mode has a current that is mirrored in an output transistor to limit the current at the output node.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
